Introduction: Motivation and Disposition: The Hidden Curriculum 1

Daniel J. Brahier
Bowling Green State University, Bowling Green, Ohio

I. Perspectives on Motivation and Disposition 9

Overview 11

Denisse R. Thompson
University of South Florida, Tampa, Florida

1. Motivation and Self-Efficacy in Mathematics Education 13

Dale H. Schunk
University of North Carolina at Greensboro, Greensboro, North Carolina
Kerri Richardson
University of North Carolina at Greensboro, Greensboro, North Carolina

2. A Model for Mathematics Instruction to Enhance Student Motivation and Engagement 31

Janette Bobis
University of Sydney, Sydney, Australia
Judy Anderson
University of Sydney, Sydney, Australia
Andrew Martin
University of Sydney, Sydney, Australia
Jenni Way
University of Sydney, Sydney, Australia

3. Identity Development: Critical Component for Learning in Mathematics 43

Alan Zollman
Northern Illinois University, DeKalb, Illinois
M Cecil Smith
Northern Illinois University, DeKalb, Illinois
Patricia Reisdorf
Northern Illinois University, DeKalb, Illinois

4. Recommendations from Self-Determination Theory for Enhancing Motivation for Mathematics.....55
Daniel J. Ross
Maryville College, Maryville, Tennessee
David A. Bergin
University of Missouri, Columbia, Missouri

5. Student Dispositions with Respect to Mathematics: What Current Literature Says.....69
James Beyers
The College of New Jersey, Ewing, New Jersey

II. Cultural and Societal Issues.....81

Overview.....83
Marilyn E. Strutchens
Auburn University, Auburn, Alabama

6. Mathematical Dream Makers: How Two Different Math Departments Brought About Equity and High Achievement.....85
Jo Boaler
Stanford University, Stanford, California

7. What Motivates Students to Take Advanced Mathematics: A Rural Perspective.....99
Rick Anderson
Eastern Illinois University, Charleston, Illinois

8. Factors That Motivate Aboriginal Students to Improve Their Achievement in School Mathematics.....113
Kanwal Neel
Simon Fraser University, Burnaby, British Columbia, Canada

9. What Motivates Mathematically Talented Young Women?.....127
Hortensia Soto-Johnson
University of Northern Colorado, Greeley, Colorado
Cathleen Craviotto
University of Northern Colorado, Greeley, Colorado
Frieda Parker
University of Northern Colorado, Greeley, Colorado

III. Motivation and Disposition in the Classroom.....141

Overview.....143
Melfried Olson
University of Hawaii at Manoa, Manoa, Hawaii

10. Metaphors: A Powerful Means for Assessing Students' Mathematical Disposition 147
Jinfa Cai
University of Delaware, Newark, Delaware
F. Joseph Merlino
The 21st Century Partnership for STEM Education, Conshohocken, Pennsylvania

11. Using Prediction to Motivate Personal Investment in Problem Solving 157
Lisa Kasmer
Grand Valley State University, Allendale, Michigan
Ok-Kyeong Kim
Western Michigan University, Kalamazoo, Michigan

12. Developing Persistent and Flexible Problem Solvers with a Growth Mindset.....169
Jennifer Suh
George Mason University, Fairfax, Virginia
Stacy Graham
Boalsburg Elementary School, Boalsburg, Pennsylvania
Terry Ferrarone
Mamaroneck Schools, Mamaroneck, New York
Gwen Kopeinig
Lewisboro Elementary School, South Salem, New York
Brooke Bertholet
Qingdao No. 1 International School of Shandong Province, Laoshan District, Shandong, People's Republic of China

13. Mark's Development of Productive Disposition and Motivation.....185
Hope Gerson
Brigham Young University, Provo, Utah
Charity Eyer
Snow College, Ephraim, Utah
Janet Walter
Brigham Young University (Retired), Provo, Utah

14. Listening to Mathematics Students' Voices to Assess and Build on Their Motivation: Learning in Groups.....201
Amanda Jansen
University of Delaware, Newark, Delaware

15. Motivating Mathematics Students with Manipulatives: Using Self-Determination Theory to Intrinsically Motivate Students.....215
Brett D. Jones
Virginia Tech, Blacksburg, Virginia
Lida J. Uribe-Flórez
New Mexico State University, Las Cruces, New Mexico
Jesse L. M. Wilkins
Virginia Tech, Blacksburg, Virginia

16. Using Movies and Television Shows as a Mathematics Motivator....229
Elana Reiser
St. Joseph's College, Patchogue, New York

IV. Professional Development Support.....237

Overview.....239
M. Lynn Breyfogle
Bucknell University, Lewisburg, Pennsylvania
Marian Small
University of New Brunswick, Fredericton, New Brunswick, Canada

17. Bringing Cool into School.....241
Keith Devlin
Stanford University, Stanford, California

18. Venturing into Storybooks: Motivating Teachers to Promote Mathematical Problem Solving.....251
Jane M. Wilburne
Penn State Harrisburg, Middletown, Pennsylvania
Jane B. Keat
Penn State Harrisburg, Middletown, Pennsylvania

19. TARGETTS: A Tool for Teachers to Promote Adaptive Motivation in Any Mathematics Lesson.....265
Melissa C. Gilbert
Santa Clara University, Santa Clara, California
Lauren E. Musu-Gillette
University of Maryland, College Park, Maryland

20. Developing Prospective Teachers' Productive Disposition toward Fraction Operations 279
Juli K. Dixon
University of Central Florida, Orlando, Florida
Janet B. Andreasen
University of Central Florida, Orlando, Florida
George J. Roy
University of South Florida—St. Petersburg, St. Petersburg, Florida
Debra A. Wheeldon
University of Central Florida, Orlando, Florida
Jennifer M. Tobias
Illinois State University, Normal, Illinois

21. Transforming Mathematics Teachers' Attitudes and Practices through Intensive Professional Development 291
W. Gary Martin
Auburn University, Auburn, Alabama
Marilyn E. Strutchens
Auburn University, Auburn, Alabama
Michael E. Woolley
University of Maryland, Baltimore, Maryland
Melissa C. Gilbert
Santa Clara University, Santa Clara, California
